

Acme Corp - Nexus Integration Hub

Acme Corp - Nexus Integration Hub

API Reference v2

Base URL

<https://api.nexus.acme-corp.example.com/v2>

All endpoints require OAuth 2.0 bearer token authentication.

POST /integrations

Create a new integration sync job.

Request body includes `source_system`, `target_system`, `entity_types`, and `options`.

Response 201 returns `job_id`, `status` pending, and `created_at` timestamp.

GET /integrations/{job_id}

Get integration job status including `progress_pct`, `entities_completed`, `entities_total`.

POST /integrations/{job_id}/rollback

Initiate rollback to pre-sync snapshot. Returns 202 with `rollback_id`.

GET /health — Liveness probe. No authentication required.

GET /ready — Readiness probe. Checks DB, Redis, and Kafka connectivity.

Error Format

All errors follow RFC 7807 with `type`, `title`, `status`, and `detail` fields.

Rate Limits

Standard tier: 100 requests/min, burst 150

Enterprise tier: 500 requests/min, burst 750

Headers: `X-RateLimit-Limit`, `X-RateLimit-Remaining`, `X-RateLimit-Reset`

Webhooks

Configure webhook URLs for job status updates.

Supported events: `integration.started`, `integration.completed`, `integration.failed`, `rollback.completed`.
